

Are your Financial Reports providing the right visibility into your Organization's activities?

In today's business environment, your staff requires the successful knowledge transfer of the functional skills inherent when using Lawson software. Our professionals provide the consultation and support specialties that will assist your team in succeeding on their own.

With our experience with the Lawson Report Writer, Knowledge Solutions consultants can unlock understanding the application in a manner that is meaningful to your accounting and financial professional. Each of our consultants has a professional background in finance and accounting along with supporting the Lawson applications for over a decade.

Knowledge Solutions Professionals will help you gain efficiencies using the Lawson Report Writer by:

- Designing reports that use the three different Lawson styles
- Using Lawson Lists in report design
- Maximizing your Row and Format set up
- Using existing rows and formats to create new reports
- Reducing the amount of time designing reports

Our Reporting Solutions for your financial reporting needs include:

- Departmental and Summary reporting development
- International Reporting Capabilities
- Balance and Income Statement design
- Budget Integration into reports
- Downloads directly into Excel - integration with the MS-Addin tool
- Develop reporting around your General Ledger accounting unit and account structure
- Redesign of existing reports
- Improved functionality in report design

Our consulting and support provides you with the knowledge and understanding needed to support your functional reporting needs.
